Note: All the of the shapes were manufactured with the Shelley backstamp but not all were manufactured with the Wileman backstamp

Variations include: (1) Ritz has two tops, a plain top and a crown top

(2) outside of moulds may be a surface that mirrors the inner surface (most Shelley moulds) or a smooth surface (Wileman backstamps and fluted bowl)

(3) within a given designation of a mould (i.e. No. 1), small size differences have been observed, likely due to timing and execution of the manufacturing process

Dimensions are approximate

Based on an article in the NSCC magazine by Curt & Lynne Leiser
